

After you've updated to the latest version of the FGCU Mobile App, you will be invited to "Try it Now."

You can then see a short introduction, informing you of what Card Controls can do when you use it.

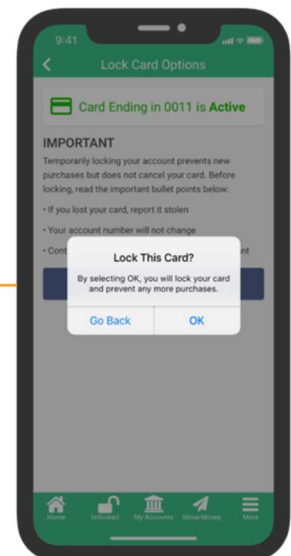

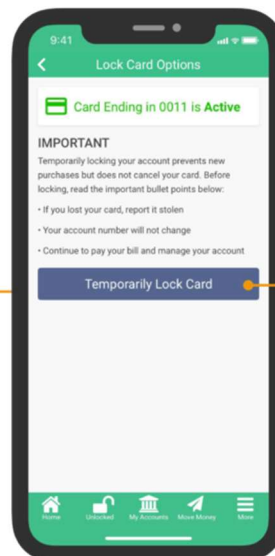

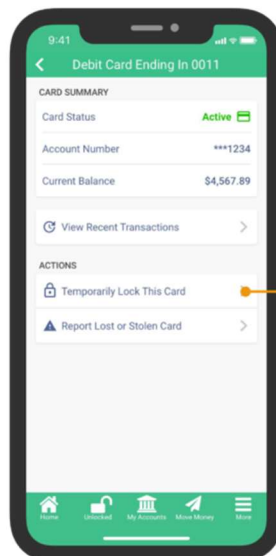

From the main screen you can see the locked or unlocked status of your cards.

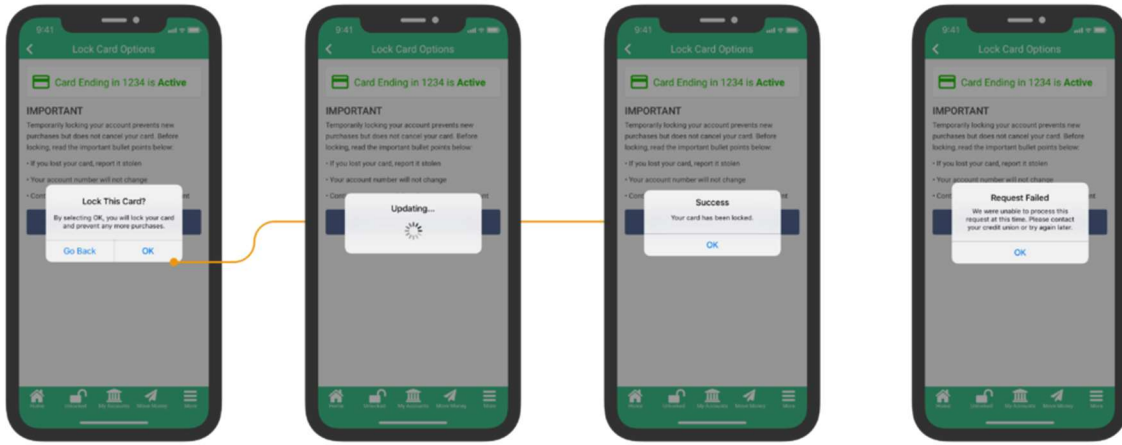

By selecting one of the listed accounts, critical details of the card, associated accounts, and payment information is displayed.

Also, you can access a **Recent Transactions** page and review the cards 10 most recent transactions.

From the **Card Summary** screen, you can temporarily lock your credit and debit cards associated to an account. *The process will be identical for credit and debit cards.*

A system alert will give you the option to officially lock your card or to exit to the previous screen if the button was pressed by mistake.

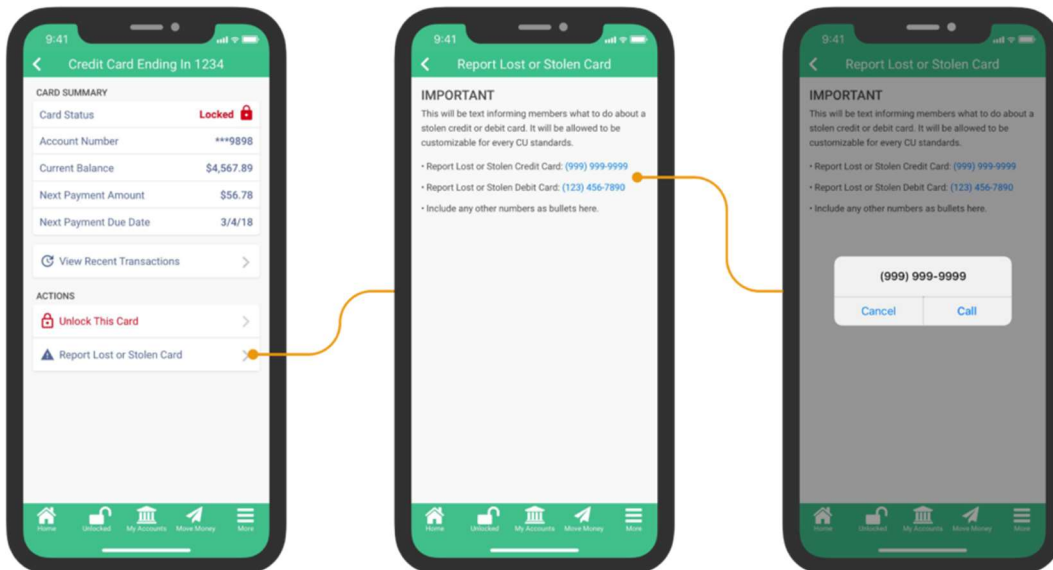

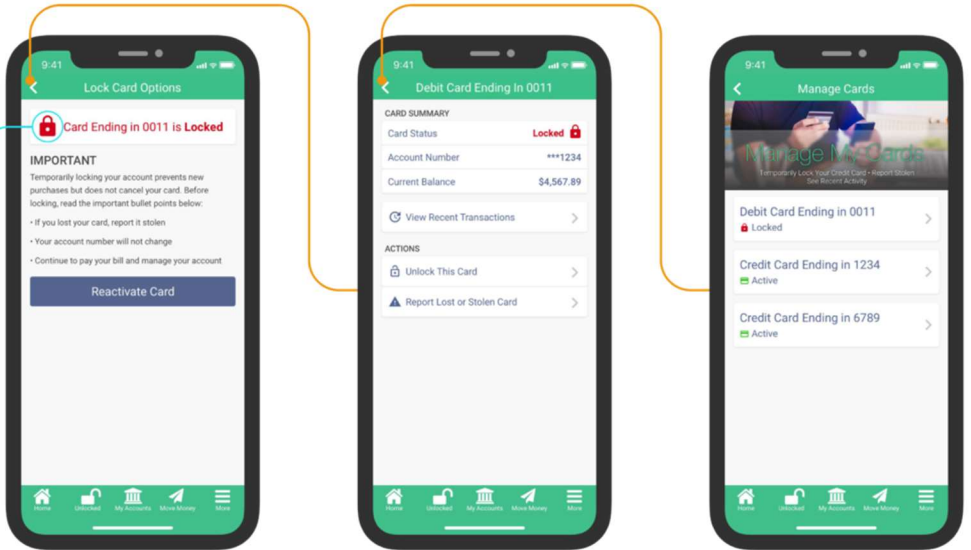

Once you proceed with locking your card, you will see a window noting the success or failure of the operation.

The status of a locked card will be shown as a red lock icon on the **Card Summary** and **Manage Cards** screens.

If you wish to reactivate your card, select the **Reactivate Card** button.

While reviewing your account via the Card Summary page, you can see an option to select the **Report Lost or Stolen Card**. Once selected, you will be directed to a number to call to that will move forward with this process.
